LOCAL PHONE NUMBER LOOKUP AND CACHE

ABSTRACT OF THE DISCLOSURE

A system and method for wirelessly connecting a computer device to a server. The system includes a computer device and a phone number look-up device. The computer device generates location data, retrieves a server phone number from memory based on the generated location data, and generates a request that includes the generated location data if no server phone number corresponds to the generated location data. The computer device wirelessly sends the generated request to a default phone number. The phone number look-up device is associated with the default phone number. The phone number look-up device receives the request from the computer device, retrieves a server phone number from a local memory based on the received request, and sends the retrieved server phone number to the computer device. The computer device wirelessly connects to a server based on the sent server phone number.
